

# CALL FOR PAPERS

**ICRCM 2021**  
**Dec 09-10, 2021**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRCM 2021 : International Conference on Reinforced Concrete and Mechanism is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Reinforced Concrete and Mechanism. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Reinforced concrete  
Use in construction  
Behavior of reinforced concrete  
Materials  
Key characteristics  
Reinforced concrete design  
Principles and practice  
Mechanism of composite action of  
reinforcement and concrete  
Anchorage (bond) in concrete: Codes  
of specifications  
Anti-corrosion measures  
Reinforcement and terminology of  
beams

Prestressed concrete  
Common failure modes of steel  
reinforced concrete  
Mechanical failure  
Carbonation  
Chlorides  
Alkali silica reaction  
Conversion of high alumina cement  
Sulphates  
Steel plate construction  
Fiber-reinforced concrete  
Non-steel reinforcement
