

# CALL FOR PAPERS

**ICSEI 2021**  
**Dec 30-31, 2021**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEI 2021 : International Conference on Systems Engineering and Integration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Systems Engineering and Integration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Systems engineering modeling and analysis  
Agent based simulation  
Analytical and stochastic modelling techniques and applications  
Biomedical visualization and applications  
Bond graph modelling  
Chaos modelling, control and signal transmission  
Circuit simulation and modeling  
Computational and systems biology  
Computational modelling and simulation in science and engineering  
Computer games and simulation  
Databases and visualization  
Design and simulation of chemical processes  
Design and simulation of electrical / electronics / computer systems

Device simulation and modeling  
Discrete and numerical simulation  
Discrete event modelling and simulation in production, logistics and transport  
Environmental modeling and forecasting  
Finite and boundary element techniques  
Health care simulation  
High performance computing and simulation  
Information and scientific visualization  
Interaction paradigms and human factors  
Internet, web and security visualization  
Knowledge-based simulation  
Logistics and supply chain management  
Mathematical and numerical methods in simulation and modeling
