

# CALL FOR PAPERS

**ICCHPCM 2022**  
**Jan 11-12, 2022**  
**Singapore, SG**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCHPCM 2022 : International Conference on Chemistry of Hybrid Polymer Composite Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Hybrid Polymer Composite Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hybrid polymer composite materials  
Hybrid polymer composite materials and applications  
Production and characterization of hybrid polymer composite materials  
Finite element modeling of hybrid polymer composite beams  
Structure and chemistry of hybrid polymer nanocomposites  
Structure and damage characteristics of hybrid composites  
Structure and chemistry of chitosan based hybrid polymer composites  
Chemistry of hybrid biopolymer composites

Green hybrid composites from cellulose nanocrystals  
Electroconductive modification of polymers for hybrid composites  
Electrically-conductive hybrid polymer composite materials  
Isolation and chemistry of biopolymer based hybrid polymer composite  
Hybrid polymer composites from bio-based epoxy resins  
Tailoring the interface of polymer composites by controlled polymerization  
Chemistry of eco-hybrid polymer composites  
Biomedical hybrid polymer materials
