

CALL FOR PAPERS

ICSRAMSL 2022
Jan 11-12, 2022
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSRAMSL 2022 : International Conference on Structural Risk Analysis Methods and Structural Lifetime is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Risk Analysis Methods and Structural Lifetime. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural risk analysis	Review of risk analysis procedures
Risk analysis methods	Failure mode and effect analysis
Structural lifetime	Fault tree analysis
Reliability	Event tree analysis
Risk analysis approaches	Expert opinion
Power plant components and systems	Hazard and operability studies
Analysis methods based on structural mechanics	Risk based regulations, guidelines and standards
Determination of risk values	Concerns with risk assessment
Qualitative, quantitative and semi-quantitative risk analysis approaches
