

CALL FOR PAPERS

ICBSPI 2022
Jan 21-22, 2022
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBSPI 2022 : International Conference on Biomedical Signal Processing and Instrumentation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biomedical Signal Processing and Instrumentation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biomedical signal processing
Biomedical instrumentation and devices
Biosensors/micro/nano/wearable and implantable technologies
Biomedical imaging and image processing
Cardiovascular and respiratory systems
Neural engineering and brain computer interface
Biomedical modelling and simulation

Biomedical and medical robots
Cellular, molecular and tissue engineering
Biomaterial and biomimetic
Biomedical and health informatics
Telemedicine and internet of things in healthcare
Diagnostic, therapeutic and rehabilitation engineering
Biomedical engineering education and society
