

CALL FOR PAPERS

ICCMCAF 2022
Jan 21-22, 2022
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMCAF 2022 : International Conference on Conformal Mapping, Complex Analysis and Complex Functions is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Conformal Mapping, Complex Analysis and Complex Functions. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Conformal mapping
Complex analysis and conformal mapping
Complex functions
Scale factors
Riemannian geometry
The extended complex plane and Riemann Sphere

Higher-dimensional Euclidean space
Uses of conformal map
Pseudo-Riemannian geometry
Cauchy-Riemann Equations and Conformal mapping
Conformal mappings of certain simply-connected domains
Conformal mapping and its applications
