

CALL FOR PAPERS

ICCPR 2022
Jan 21-22, 2022
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPR 2022 : International Conference on Control and Prevention of Rabies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Control and Prevention of Rabies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Global epidemiology of the disease
Molecular epidemiology
Cell biology and Pathogenesis
New developments in human vaccines
New developments in animal vaccines
Ongoing efforts to treat human rabies cases

Rabies control in wild life
New developments in laboratory diagnosis
Use of monoclonal antibodies for passive immunotherapy
Ongoing global and regional control and elimination strategies
History of rabies prevention
