

CALL FOR PAPERS

ICESG 2022
Jan 14-15, 2022
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESG 2022 : International Conference on Ecological Speciation and Genetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecological Speciation and Genetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Adaptive radiations
Pleiotropic effects of adaptation
and speciation
Multifarious versus
strong-selection scenarios for
ecological speciation

The geography of ecological
speciation and the role of gene
flow
Parallel evolution of reproductive
isolation
Genetic bases of ecological
adaptation and genomic signatures
of ecological speciation
