

CALL FOR PAPERS

ICNTE 2022
Jan 28-29, 2022
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNTE 2022 : International Conference on Naval and Transportation Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Naval and Transportation Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Naval engineering (naval architecture)
Advanced naval engineering
Naval engineering, current and common applications
Hydrostatics, hydrodynamics, structures and arrangements
Ship design and naval engineering
Design engineering
Ship technology
Ship manufacturing
Shipyards support
Ship design process
Wind tunnel, scaled model, or full scale validation

Ship design guidance for effective ship aerodynamic interface
Operational performance considerations
Safety advantages and disadvantages of vehicles
Innovative system designs
Operational risks and mitigation strategies
Autonomous and/or automated systems
Modeling and simulation for engineering design, operational analyses and training
Safety, human systems integration and training
Manned and unmanned vehicle operations
Future research and development requirements
Vessel design
