

# CALL FOR PAPERS

**ICHIS 2022**  
**Jan 21-22, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHIS 2022 : International Conference on Hybrid Intelligent Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hybrid Intelligent Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hybrid Intelligent Systems  
Fusion of soft computing and hard computing  
Evolutionary Computation  
Visualization Techniques  
Ensemble Techniques  
Data mining and decision support systems  
Intelligent agent-based systems (complex systems), cognitive and Reactive distributed AI systems

Internet modelling  
Human interface  
Case base reasoning  
Chance discovery  
Nature-inspired Smart Hybrid Systems  
Applications in: security, prediction, control, robotics, image and speech signal processing, bioinformatics, biology and medicine, business and management, knowledge management, artificial societies, chemicals, pharmaceuticals, food industry, geographic information systems, materials and environment engineering
