

CALL FOR PAPERS

ICSPGEM 2022
Jan 28-29, 2022
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSPGEM 2022 : International Conference on Sustainable Power Generation and Energy Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Power Generation and Energy Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable power generation	Sustainable power generation and distribution
Sustainable energy engineering	Solar power
Renewable and sustainable energy	Biomass energy
Optimization methods applied to renewable and sustainable energy	Hydroelectricity
Energy, environment and sustainable development	Wind energy
Sustainable energy development	Hydrogen energy
Energy utilization	Tidal and wave energy
Turbomachinery and transformation of energy systems	Geothermal power
Environmental and socio-economic issues	Energy conservation
Sustainable energy utilization	Bioenergy conversion methods
Transformation of energy systems	Bioenergy applications
Renewable energy systems	Green energy and economy
Renewable energy technology
