

CALL FOR PAPERS

ICBEA 2022
Jan 25-26, 2022
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBEA 2022 : International Conference on Bioelectrical Engineering and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Bioelectrical Engineering and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bioelectrical engineering	Cardiovascular biomechanics
Bio-mechanics	Computational biology
Bio-signal processing	Computer aided and automated diagnosis
Neural engineering and neuromuscular systems	Functional imaging
Medical informatics	Gait and posture analysis
Medical imaging and solid modelling	Gene networks
Biomechanical devices and engineering	Health monitoring devices
Biofluid mechanics	Medical imaging and image processing
Bioinformatics	Molecular sequence analysis
Biomaterials and biomechatronics	Nanotechnology For biomedical applications
Biomedical devices and biomems	Neuroengineering
Biophotonics and biosensors	Neuroimaging
Brain-Computer interfaces	Pattern analysis for biomedical applications
