

# CALL FOR PAPERS

**ICBRBSA 2022**  
**Jan 11-12, 2022**  
**Singapore, SG**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBRBSA 2022 : International Conference on Blast Resistant Buildings and System Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Blast Resistant Buildings and System Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Blast resistant buildings	Information sensitivity
Blast-proof buildings	Risk assessment
Blast resistant modular buildings	Vulnerability assessment
Architectural and structural design for blast resistant buildings	Threat reduction
Blast resistant buildings design	Materials performance
Design approaches	Performance criteria for blast resistant structural components
Design considerations	Performance verification
Structural form and internal layout	Blast loading
Structural response	Fragmentation
Nonstructural elements	System analysis and design
