

CALL FOR PAPERS

ICNRICF 2022
Jan 28-29, 2022
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNRICF 2022 : International Conference on Natural Resource Inventories and Computational Forestry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Natural Resource Inventories and Computational Forestry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mathematical and computational forestry
Computational techniques applied to forest management
Software developments, and simulations for forestry
Sampling and natural resource inventories
GIS and remote sensing
Growth and yield and quantitative silviculture
Hydrology and water resources

Programming and software development
Forest measurements, quantitative methods and management
Natural resource econometrics
Operations research and decision support systems
Decision support tools for sustainable forest management
Biomass supply and sustainability analysis
