

CALL FOR PAPERS

ICCISED 2022
Jan 07-08, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCISED 2022 : International Conference on Computer-Aided Structural Engineering and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer-Aided Structural Engineering and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer-aided structural engineering
Computerized structural design
Software application for design of structures
Computerized method for structural design
Computerized structural design and analysis
Computerized methods and tools
Computer programming
Mechanics of materials

Concrete engineering and advanced concrete technology
Structural dynamics and analysis
Numerical methods in structural mechanics
Geotechnical and earthquake engineering
Finite element method
Foundation engineering
Soil dynamics and rock mechanics
