

CALL FOR PAPERS

ICDDPO 2022
Jan 07-08, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDDPO 2022 : International Conference on Deterministic Dynamic Programming and Optimization is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Deterministic Dynamic Programming and Optimization. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Deterministic dynamic programming	Bellman equations
Dynamic optimization	Optimal policy and backtracking
Dynamic programming in mathematical optimization	Dynamic programming algorithm
Dynamic programming in bioinformatics	Dynamic programming and stochastic control
Dynamic programming in computer programming	Bellman optimality principle
Deterministic dynamic programming and applications	Shortest path problem
Advances in dynamic programming	Computational efficiency
Control optimization	Knapsack problem
Recurrence equations	Travelling salesman problem
