

CALL FOR PAPERS

ICP 2022
Jan 07-08, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICP 2022 : International Conference on Phylogenetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Phylogenetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Genome assembly	Models of evolution
Genome and chromosome annotation	Comparative biological methods
Gene finding	Population genetics
Alternative splicing	Structure matching, prediction, analysis and comparison
EST analysis	Microarrays
Comparative genomics and metagenomics	Proteomics
Multiple sequence alignment	Mass spectrometry
Sequence search and clustering	Linkage analysis
Function prediction	Association analysis
Motif discovery	Population simulation
Functional site recognition in protein	Haplotyping
RNA and DNA sequences	Marker discovery
Phylogeny estimation	Genotype calling
