

# CALL FOR PAPERS

**ICERL 2022**  
**Feb 25-26, 2022**  
**Sydney, Australia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICERL 2022 : International Conference on Educational Robotics and Lego is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Educational Robotics and Lego. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Educational robotics  
Robots in education  
Robotics for education and training  
Educational mobile robots  
Research on robots in education  
Its effects on learning activity  
Pedagogical theories

Role of teachers in robots for education  
Designing socially acceptable educational robots  
Educational robot manufacturers and platforms  
Lego robotics for students  
Educational robotics in elementary curriculum  
Robotics activities for underserved communities  
Middle school robotics
