

# CALL FOR PAPERS

**ICABCSET 2022**  
**Feb 04-05, 2022**  
**Bangkok, Thailand**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICABCSET 2022 : International Conference on Approximate Bayesian Computation in Science, Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Approximate Bayesian Computation in Science, Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Approximate Bayesian Computation  
Regression Approaches  
Summary Statistics  
Likelihood-free Model Choice  
Approximate Bayesian Computation  
and Indirect Inference  
High-Dimensional Approximate  
Bayesian Computation

Theoretical and Methodological  
Aspects of Markov Chain Monte Carlo  
Computations  
Approximate Bayesian Computation in  
Science, Technology and  
Engineering  
Application of ABC to Infer about  
the Genetic History of Pygmy  
Hunter-Gatherers  
Approximate Bayesian Computation in  
Ecological Modelling  
Approximate Bayesian Computation in  
Nuclear Imaging
