

# CALL FOR PAPERS

**ICSBSEA 2022**  
**Feb 04-05, 2022**  
**Bangkok, Thailand**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSBSEA 2022 : International Conference on Search-Based Software Engineering and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Search-Based Software Engineering and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Search-based software engineering  
Application areas  
Requirements engineering  
Debugging and maintenance  
Testing  
Optimizing software  
Project management  
Tools  
Methods and techniques  
Industry acceptance  
Generality  
Robustness  
Scalability through parallelism

Re-unification  
Direct fitness computation  
Search based software testing  
Trends, techniques and applications  
Search-based software test data generation  
Dynamic adaptive search based software engineering  
Search-based software maintenance  
Search based software engineering and predictive modeling  
Search based software engineering for program comprehension  
Search based requirements optimization  
Evolutionary computing in search-based software engineering  
Search-based techniques
