

CALL FOR PAPERS

ICGPM 2022
Feb 11-12, 2022
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGPM 2022 : International Conference on Geotechnical Physical Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical Physical Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Physical modeling in geotechnics
Geoenvironmental experiments
Modelling at single gravity and multiple gravities
Model testing and simulation of construction processes
Physical modelling studies of soil properties and soil behavior
Shallow and deep foundations

Dams, embankments and slope stability
Ground improvements, reinforcements and geohazards
Physical modelling in geotechnical earthquake engineering
Offshore geotechnics
Advanced use of image analysis for physical modeling
