

CALL FOR PAPERS

ICAICE 2022
Feb 15-16, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAICE 2022 : International Conference on Advanced Intelligent Control Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Intelligent Control Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent control engineering	Neural network controllers
Intelligent control	Genetic algorithms
Foundations of intelligent control	The population of individuals
Intelligent control techniques	Genetic operators
Intelligence and intelligent control	Expert control
Intelligent control systems	Intelligent and autonomous control
Characteristics of intelligent control systems	Planning systems for control
Applications	Bayesian controllers
Fuzzy control	Artificial intelligence
Fuzzy control design	Computing approaches
Design concerns	Bayesian probability
Neural networks	Machine learning
Multilayer perceptrons	Evolutionary computation
