

CALL FOR PAPERS

ICCSB 2022
Feb 15-16, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSB 2022 : International Conference on Computational Systems Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Systems Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Next-Gen Sequencing and
Metagenomics
Evolution, Phylogeny, Comparative
Genomics
SNPs and haplotype analysis, GWAS
Protein/RNA Structure, Function and
Interactions
Transcriptomics - Microarray Data
Analysis
Gene Regulation, Alternative
Splicing, Network/Pathway Analysis
Proteomics, PTMs, Metabolomics
Epigenomics, non-coding RNA
analysis, DNA methylation analysis
Biomedical Intelligence, Clinical
Data Analysis, and Electronic
Health Record
Biomedical Signal/Image Analysis

Genome-Phenome Analysis
Biomarker Discovery
Biomedical Text Mining and
Ontologies
Biological Data Mining and
Visualization
Computational Modeling and Data
Integration
High Performance Computing
Healthcare knowledge representation
and reasoning
Health data acquisition, analysis
and mining
Healthcare information systems
Clinical Decision Support and
Informatics
