

# CALL FOR PAPERS

**ICESPE 2022**  
**Feb 15-16, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESPE 2022 : International Conference on Energy Systems and Power Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy Systems and Power Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy system engineering  
Solar energy systems  
Wind energy systems  
Hydrogen energy systems  
Biomass energy systems  
Geothermal energy systems  
Bio mass energy  
Hydrolique energy  
Geothermal energy  
Combustion and energy production systems  
Clean coal technologies  
Combustion

Emissions' control  
Fossil fuels and applications  
Fuels and alternatives  
Gas turbine technologies  
Gas-fired power plants  
Nuclear power  
On-site power  
Power devices and driving circuits in energy systems  
Utility-scale renewable power  
Energy and exergy  
Energy conservation and analysis  
Energy conversion
