

CALL FOR PAPERS

ICESEM 2022
Feb 18-19, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESEM 2022 : International Conference on Electronic Systems Engineering and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electronic Systems Engineering and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electronic systems	System fault characterization
Electronic system-level design and verification	System-level functional test
Applied electronics	Integration testing
Advances in electronics	On-line system test
Industrial applications of electronics	Testing of real-time systems
Engineering applications in modern electronics	Analogue and digital electronic systems
Diagnosis: resolution vs. Repair cost	Automotive electronics
System-level fault tolerance	Electronics in industry and transport
Self-repairing systems	Electronics in measurement and control
Embedded system testing	Electronics in medicine
System-level built-in self-test	Electronics in physics and space
Hardware/software co-simulation	Signal processing
Testing of concurrent/globally asynchronous systems
