

# CALL FOR PAPERS

**ICGEMA 2022**  
**Feb 25-26, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGEMA 2022 : International Conference on Green Energy Management and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Green Energy Management and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green energy analysis and management  
Green energy and transportation  
Green energy and buildings  
Transmission and distribution of green energy  
Smart grid technologies for green energy  
Green energy storage  
Emerging green energy sources  
Green energy policies  
Sustainable energy management  
Renewable energy management  
Water, waste and sustainable energy management

Energy and sustainable development  
Energy engineering and sustainability  
Solar energy and sustainable energy management  
Energy management, planning, implementation and control  
Methods and techniques for implementation of sustainable energy management  
Sustainable energy development and monitoring  
Energy and management  
Energy sources and technologies  
Energy innovation for the development of new energy sources  
Modelling and simulation of energy systems  
Energy markets and demand response
