

CALL FOR PAPERS

ICCFC 2022
Mar 08-09, 2022
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCFC 2022 : International Conference on Carbon Fiber Composites is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Carbon Fiber Composites. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbon fiber composites
Carbon fiber composite materials
Sustainable carbon fiber composites
Structure, properties, production and applications of carbon fibers
Polymer-matrix composites
Metal-matrix composites
Ceramic-matrix composites
Hybrid composites
Carbon fiber composite fabrication, characterization, evaluation, and application
Carbon fiber sources
Carbon fiber composites from natural resources
Carbon fiber composite material evaluation and processing
High performance carbon fiber composites

Carbon fiber composites for engineering applications
Tensile and compression properties of carbon fiber composites
Mechanical and dynamic mechanical analysis of carbon fiber composites
Commercial and experimental carbon fiber composites
High strength carbon fiber composites
Atomic structure and structural stability of carbon fiber composites
Structural modeling of carbon fiber composites
Classification of carbon fiber composites
Processing, markets and applications of carbon fiber composites
Natural and synthetic fibers for carbon fiber composites
Structure of carbon fiber composites
Mechanical properties of carbon fiber composites
