

CALL FOR PAPERS

ICEGG 2022
Mar 08-09, 2022
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEGG 2022 : International Conference on Engineering Geology and Geophysics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Engineering Geology and Geophysics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Airborne Geophysics	Forensics
Application of Artificial Neural Networks	Geohazards (earthquake mitigation and collapse structure mapping)
Applied Geophysics in Seismology	Geologic Mapping
Archeo-Geophysics	Geophysical and Environmental Engineering
Characterization and Monitoring in Alpine and Cold Regions	Geophysical Engineering
Civil Engineering / Non-Destructive Testing	Geophysics for Dam Assessment and Monitoring
Dam Safety	Geophysics for Soil Mapping and Precision Agriculture
Electrical Resistivity Studies	Geophysics for Tunneling
Engineering Geology - Ground stability, material properties, site response, coastal/sedimentation, weathered layer/stratigraphy/variability	Gravity and Magnetic Studies
Engineering Geophysical Applications for Civil and Industrial Construction Domains	Ground Penetrating Radar Studies
Engineering Geophysics Application for the Energy Industry	Groundwater (exploration and contaminant mapping)
Environmental and Engineering Geophysics	Hydrogeophysics - Groundwater and shallow water structures and characterization
Environmental Geophysics	Infrastructure (highways and bridges)
Applications and Natural Hazards
