

CALL FOR PAPERS

ICIAA 2022
Mar 08-09, 2022
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIAA 2022 : International Conference on Intelligent Agriculture and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Agriculture and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent agriculture and farming

Electronic commerce technology for agricultural products

Computer simulation, optimization and modeling

Machine vision and navigation technology

Decision support systems, expert systems and artificial intelligence

Agriculture information development and its technology

Agricultural product quality safety, inspection and traceability technology

Agriculture modernization model and technology integration

Agriculture system engineering theory, method, and application

Intelligent control for agriculture system

Agriculture complex large system modelling and control theory

Cloud control in agriculture system

Distributing control and control networks in agriculture

Internet of things for agriculture

Agriculture knowledge obtain and identification

Detecting and sensors

Greenhouse intelligent control system

Agriculture production process control and management

Renewable energy and sustainable agriculture

Agricultural biotechnology

Animal and human health for the environment and development

Adapting agriculture and forestry to climate change

Economic perspectives for agriculture and forestry

Global climate change and ecosystems
