

# CALL FOR PAPERS

**ICMSDC 2022**  
**Mar 08-09, 2022**  
**Bangkok, Thailand**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSDC 2022 : International Conference on Multibody System Dynamics and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Multibody System Dynamics and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multibody system dynamics  
Numerically efficient multibody  
system dynamics techniques  
Design principles for exact  
constraint  
Underconstraint and overconstraint  
mechanical systems  
Underactuated and overactuated  
compliant mechanisms

Flexible multibody dynamics and  
reduced order modelling  
Mechatronic design and control  
systems  
Parameter optimization and  
manufacturing tolerances  
Simulation for engineering design  
Applications to engineering systems
