

CALL FOR PAPERS

ICNCCS 2022
Mar 29-30, 2022
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNCCS 2022 : International Conference on Network Coding and Computer Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Network Coding and Computer Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Applications of network coding
Architectural design and optimization aspects of network coding
Cross layer paradigms in network coding
Implementation and deployment aspects of network coding
Index coding
Information theory and fundamental limits of network coding
Network code constructions and algorithms

Network coding for distributed storage
Network coding for wireless communication
Physical layer network coding
Robustness, energy, feedback, or delay aspects of network coding
Security and error correction for network coding
Showcases of network coding
