

CALL FOR PAPERS

ICMSDC 2022
Mar 08-09, 2022
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSDC 2022 : International Conference on Multibody System Dynamics and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Multibody System Dynamics and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multibody system dynamics
Numerically efficient multibody
system dynamics techniques
Design principles for exact
constraint
Underconstraint and overconstraint
mechanical systems
Underactuated and overactuated
compliant mechanisms

Flexible multibody dynamics and
reduced order modelling
Mechatronic design and control
systems
Parameter optimization and
manufacturing tolerances
Simulation for engineering design
Applications to engineering systems
