

# CALL FOR PAPERS

**ICCESP 2022**  
**Mar 22-23, 2022**  
**Dubai, UAE**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCESP 2022 : International Conference on Civil Engineering and Specialist Practice is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Engineering and Specialist Practice. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering  
Civil engineering practice  
Specialist practice  
Practical approach  
Management practices  
Practical application of new technologies  
Adapting civil engineering practice  
Civil engineering works  
Civil engineering planning  
Civil engineering contracts  
Civil engineering construction  
Infrastructure projects  
Transport systems and water supply networks

Consultant of civil engineering works  
Construction management and analysis  
Environmental concerns  
Creating and maintaining structures  
Materials science and statistical analysis  
Functional structures  
Strengthening and rehabilitating structures  
Manufacturing processes  
Structures that surround us: buildings, transport networks, energy and water supplies  
Design, construction and maintenance of the physical and naturally built environment  
Materials science  
Construction and structure  
Water resources
