

CALL FOR PAPERS

ICDPR 2022
Mar 25-26, 2022
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDPR 2022 : International Conference on Data Processing in Robotics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Processing in Robotics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Robotics
Networked and distributed
intelligent control
Real time supervisory control
Adaptive control systems
Embedded systems
Mobile and autonomous systems
Virtual systems
Multi-agent collaborative systems
Space and underwater robotics
Entertainment robotics
Agriculture and field robotics

Data processing
Ubiquitous data management and
mobile databases
Data privacy and security
Semi-structured data and XML
databases
Data mining
Web data management and deep web
Workflow, web services
Stream processing and sensor
databases
Database applications and
experiences
Temporal, spatial, and multimedia
databases
Database system internals and
performance
