

CALL FOR PAPERS

ICCCSTA 2022
Mar 29-30, 2022
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCSTA 2022 : International Conference on Cell Culture Systems, Technologies and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cell Culture Systems, Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cell culture technologies
Mammalian cell culture
Applications of cell culture
Cell culture in two dimensions
Cell culture in three dimensions
3D cell culture in hydrogels
3D cell culturing by magnetic levitation
Tissue culture and engineering
Vaccines
Culture of non-mammalian cells
Plant cell culture methods
Insect cell culture

Bacterial and yeast culture methods
Viral culture methods
Cell line development advances
Impact of process conditions on product quality
Advanced cell culture process controls and modeling
Scale-up and scale-down challenges for cell culture-based manufacturing
Integrated continuous process development for cell culture
Non-protein products of cell culture
Current concerns and emerging trends in cell culture bioprocessing
Quality by design and scale-down model qualification
Novel protein formats
