

CALL FOR PAPERS

ICECA 2022
Mar 25-26, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECA 2022 : International Conference on Exercise Capacity and Aging is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Exercise Capacity and Aging. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Exercise capacity	Clinical exercise physiology and pharmacology
Exercise capacity and functional testing	Exercise testing and exercise prescription
Exercise capacity and aging	Endocrinology and metabolic disorders
Exercise capacity and mortality	Hyperlipidemia and dyslipidemia
Impact of the exercise mode on exercise capacity	Metabolic syndrome
Exercise capacity and immune function	Cardiovascular diseases
Exercise capacity and muscle strength	Diseases of the respiratory system
Exercise capacity in patients with chronic heart failure	Clinical exercise testing, prescription and programming
Regular physical exercise	Biochemical analysis of health and disease
Exercise capacity and the risk of death in women	Pathophysiology of cardiometabolic disease
Exercise capacity and quality of life	Psychology of health and disease
Clinical exercise physiology	Research methods and statistics
Physical activity	Cardiovascular disease, treatments, and investigations
