

CALL FOR PAPERS

ICEMGFAF 2022
Mar 25-26, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEMGFAF 2022 : International Conference on Evolutionary Mechanisms, Gene Flow and Allele Frequencies is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Evolutionary Mechanisms, Gene Flow and Allele Frequencies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Evolutionary biology

Evolution

Evolutionary processes

Gene flow

Gene migration

Population genetics

Transfer of alleles or genes from one population to another

Gene pool

Allele frequencies

Proportion of members carrying a particular variant of a gene

Barriers to gene flow

Gene flow in humans

Gene flow between species

Genetic pollution

Horizontal gene transfer

Genes as phylogenetic markers

Genetic erosion

Genetic admixture

Genetic drift

Allelic drift

Natural selection

Selection and genetic variation

Genetic basis of natural selection
