

# CALL FOR PAPERS

**ICESSE 2022**  
**Mar 25-26, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESSE 2022 : International Conference on Energy, Sustainability and Society is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy, Sustainability and Society. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy sustainability  
Energy for sustainable development  
Energy sustainability in global cities  
Renewable energy sources  
Energy-efficient and sustainable buildings  
Policy, education, and legal aspects of energy  
Climate control and the environment  
Fuel cells and hydrogen energy technologies  
Energy systems: design, integration, implementation  
Renewable and alternative energy technologies  
Sustainable energy research, technologies, markets and policies  
Research, development and implementation of sustainable energy systems  
Inventory accounting method discussion and verification

Production-based and consumption-based energy/GHG emission inventories  
Energy consumption/GHG emissions from industry enterprises, transportation, and residents  
Multi-city research on energy and related GHG emissions  
Energy/GHG emission inventories of city agglomerations  
Energy consumption and GHG emissions embodied in trade among cities  
Multi-city cooperation and restriction on Energy consumption and GHG emissions  
Assessment and indicators for cities  
Energy mix and security  
The impact of urbanization and lifestyle changes on residential energy use and GHG emissions  
Energy supply chain in cities  
Mitigation roadmaps for cities  
Energy consumption control and GHG emission reduction policy  
Low-carbon development pathways of cities
