

CALL FOR PAPERS

ICDMSEA 2022
Apr 08-09, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMSEA 2022 : International Conference on Dynamic Mechanical Spectroscopy, Engineering and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dynamic Mechanical Spectroscopy, Engineering and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanical engineering
Dynamic mechanical analysis
Dynamic mechanical spectroscopy
Viscoelastic properties of materials
Dynamic moduli of polymers
Applications
Measuring glass transition temperature
Polymer composition
Instrumentation
Types of analyzers
Test modes
Temperature sweep

Frequency sweep
Dynamic stress-strain studies
Combined sweep
Design and analysis of mechanical systems
Manufacturing and maintenance of mechanical systems
Design, production and operation of machinery
Modern tools
Subdisciplines
Mechanics
Mechatronics and robotics
Structural analysis
