

# CALL FOR PAPERS

**ICSFSED 2022**  
**Apr 08-09, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSFSED 2022 : International Conference on Structural Fire Safety Engineering and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Fire Safety Engineering and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Fire scenarios and design fires  
Numerical simulation of fire impact  
on components and structures  
Numerical simulation of the thermal  
behavior as well as the structural  
and deformation behavior of  
components exposed to fire  
High temperature material  
properties

Overall structural behavior under  
fire exposure  
Validation and verification  
Risk methods and safety concepts  
Application examples of structural  
fire engineering
