

CALL FOR PAPERS

ICSMPD 2022
Apr 08-09, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMPD 2022 : International Conference on Software Metering, Planning and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Metering, Planning and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software metering

- Active / passive software metering
- Intellectual property metering
- Tracking and maintaining software licenses
- Real-time monitoring of applications
- Fixed planning to allocate software usage
- Planning for software metering
- Configuring software metering
- Software metering rules
- Operations and maintenance for software metering
- Security and privacy for software metering
- Technical reference for software metering
- Software metering and usage analysis

Planning and design

- Data collation
- Trend calculation
- Data summarization
- Software metering server
- Software metering database server
- Administration tools
- Assigning roles
- Setup and configuration
- License balancing
- Site management
- Data collection
- Security
