

# CALL FOR PAPERS

**ICASSE 2022**  
**Apr 29-30, 2022**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASSE 2022 : International Conference on Applications of Satellite Systems Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Satellite Systems Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Satellite systems engineering  
Satellite engineering  
Space mission planning and development  
Satellite design and space component design  
Satellite operations  
Management and operation of space and supporting infrastructure  
Space law  
Design and building of ground-specific components to satellite launch  
Satellite data analysis: remote sensing, and earth observation

Satellite applications such as:  
satellite communications, global navigation systems  
Space related postgraduate research  
Satellite communications design and engineering  
Satellite thermal control engineering  
Satellite technology for communications  
Satellite space bus and system development  
Satellite payload and application development  
Satellite ground station and mobile terminal development
