

CALL FOR PAPERS

ICCAC 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCAC 2022 : International Conference on Computational Approaches in Chemioinformatics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Approaches in Chemioinformatics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cheminformatics and computational chemistry
Chemical information systems, software and databases, and molecular modelling
Chemical structure representations
Chemical substance and chemical reaction databases
Computer and molecular graphics
Computer-aided molecular design
Expert systems and data mining techniques in chemistry

Cheminformatics in drug discovery cycle
Chemogenomics, cheminformatics and molecular modeling
Virtual libraries and screening
Quantitative structure-activity relationship
Environmental chemistry databases
Data: quality, modeling and delivery
