

# CALL FOR PAPERS

**ICCAFL 2022**  
**Apr 29-30, 2022**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCAFL 2022 : International Conference on Computer Architecture and Fuzzy Logic is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Architecture and Fuzzy Logic. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrical and computer engineering  
High performance computing  
Expert systems  
Embedded system and software  
Fuzzy logic  
Soft computing techniques in power systems  
Smart grids  
Computer architecture and real time systems  
Dependable, reliable and autonomic computing  
Software engineering and quality  
Sensing and sensor networks

Communication engineering  
Analog circuits and signal processing  
Electronics and electrical engineering  
Computer science applications  
Mechanical systems  
Photonics and optoelectronics  
Networking, communication and multimedia  
Information engineering  
Wireless/Mobile communication And computing  
Cloud computing
