

# CALL FOR PAPERS

**ICFTBM 2022**  
**Apr 29-30, 2022**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFTBM 2022 : International Conference on Forest Tree Breeding and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forest Tree Breeding and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Tree breeding
- Forestry tree breeding
- Optimization
- Tree improvement
- Climate change
- Techniques in forest tree breeding
- Application of genetic
- Reproductive biology
- Economics principles to the genetic improvement
- Management of forest trees
- Selective breeding of livestock
- Selection of superior phenotypes

- Natural or planted forest
- Genetic trials
- Field design
- Advanced technologies in tree breeding
- Breeding population structure
- Genetic diversity and risk in forestry
- Cuttings or in-vitro methods
- Improvement and adaptation to particular conditions
- Pest- and disease-resistance
- Wood properties
- Fast development in plant genetics and genomics
- Genetically modified tree
