

CALL FOR PAPERS

ICMSN 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSN 2022 : International Conference on Materials Science and Nanoscience is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Materials Science and Nanoscience. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Metamaterials for optic and optoelectronic applications
Nanomagnetics and magneto-optical nanomaterials
Photonic and plasmonic nanomaterials
Materials science and engineering
Energy materials and semiconductors
Mining and metallurgy
Surface science and engineering
Biomaterials and tissue engineering
Materials chemistry and sustainable chemistry
Nanomedicine and materials for drug delivery applications
Electronic, optical and magnetic materials
Advances in instrumentation technology
Polymer science and materials

Emerging areas of materials science
Composite materials
Nanomaterials and nanocomposites
Advances in nanomaterials science
Carbon nanomaterials
Advances in dielectric materials and electronic devices
Nanomedical approaches for diagnostics and treatments
Nanomedicine and biomedical engineering
Photonics
Graphene materials and technologies
Industrial coating materials
Ceramic materials
Materials processing and manufacturing
