

CALL FOR PAPERS

ICPPD 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPPD 2022 : International Conference on Principles and Practices of Dendroecology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Principles and Practices of Dendroecology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dendroecology	Calibration and verification
Past and present forest environments	Modeling
Parameters reflecting tree-ring variability	Ring-width measurement
General principles and practices of dendroecology	Spruce budworm effects on forest growth
Uniformitarianism	Studies of forest decline
Limiting factors	Climatic variability and change
Crossdating	Earth's ecosystems
Standardization	Analyzing the effects of air pollution on tree growth
Variance of the mean and the signal-to-noise ratio	Changes in ring widths over time
Sample replication	Patterns in dated tree-ring series and all the ecological factors
Tree and site selection	Limitations of dendroecology
