

CALL FOR PAPERS

ICPPD 2022 Apr 29-30, 2022 Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPPD 2022: International Conference on Principles and Practices of Dendroecology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Principles and Practices of Dendroecology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dendroecology
Past and present forest
environments
Parameters reflecting tree-ring
variability
General principles and practices of
dendroecology
Uniformitarianism
Limiting factors
Crossdating
Standardization
Variance of the mean and the
signal-to-noise ratio
Sample replication
Tree and site selection

Calibration and verification
Modeling
Ring-width measurement
Spruce budworm effects on forest
growth
Studies of forest decline
Climatic variability and change
Earth's ecosystems
Analyzing the effects of air
pollution on tree growth
Changes in ring widths over time
Patterns in dated tree-ring series
and all the ecological factors
Limitations of dendroecology
