

CALL FOR PAPERS

ICRSGEA 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRSGEA 2022 : International Conference on Remote Sensing for Geotechnical Engineering Applications is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Remote Sensing for Geotechnical Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical applications of remote sensing

Geotechnical application areas for remote sensing

Remote sensing data collection and transmission

Remote sensing data for geotechnical investigations

Remote sensing for geotechnical earthquake engineering

Remote sensing techniques and platforms

Spaceborne and airborne remote sensing for geotechnical applications

Remote sensing techniques in geoenvironmental engineering

Geological and environmental remote sensing

Environmental remote sensing and systems analysis

Applications of remote sensing techniques in geological and environmental sciences

Geodetic remote sensing and data acquisition techniques

Remote sensing and geodetic measurements

Remote sensing measurements
