

# CALL FOR PAPERS

**ICSSET 2022**  
**Apr 29-30, 2022**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSET 2022 : International Conference on Simulation Software Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Simulation Software Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Simulation software	Emergency simulators
Computer simulations and applications	Vehicle simulators
Advanced simulations for processes	Flight simulators
Principles of computer simulations	Driving simulators
Simulation and simulation modeling	Simulation games
Methodology of simulation software	Vehicle simulation games
Recent advances in simulation engineering	Power system behaviour
Simulation software, modeling and analysis	Simulations of weather conditions
Practice of simulation	Simulations of electronic circuits
Computer simulators	Simulations of chemical reactions
Scientific simulators	Mechatronics
Social simulators	Simulations of heat pumps
Battlefield simulators	Simulations of feedback control systems
